-> Sweco Development Transport Planning

The Transport Planning team at Sweco has a strong track record in helping to secure planning permission for its clients. Our team brings together a wide range of skills and experience to support both private and public sector projects. We are highly experienced in UK regulatory and statutory processes, and our expertise covers all aspects of the RIBA Plan of Work from feasibility through to construction and handover, combining skills in developing access strategies, transport planning, traffic engineering, parking, delivery vehicle access design and management and travel planning.

02.

Trusted partners

Our transport planning team has a strong track record in delivering development planning projects, providing our clients with clear and commercially viable advice at every turn.
