

Join us on the journey to a better future

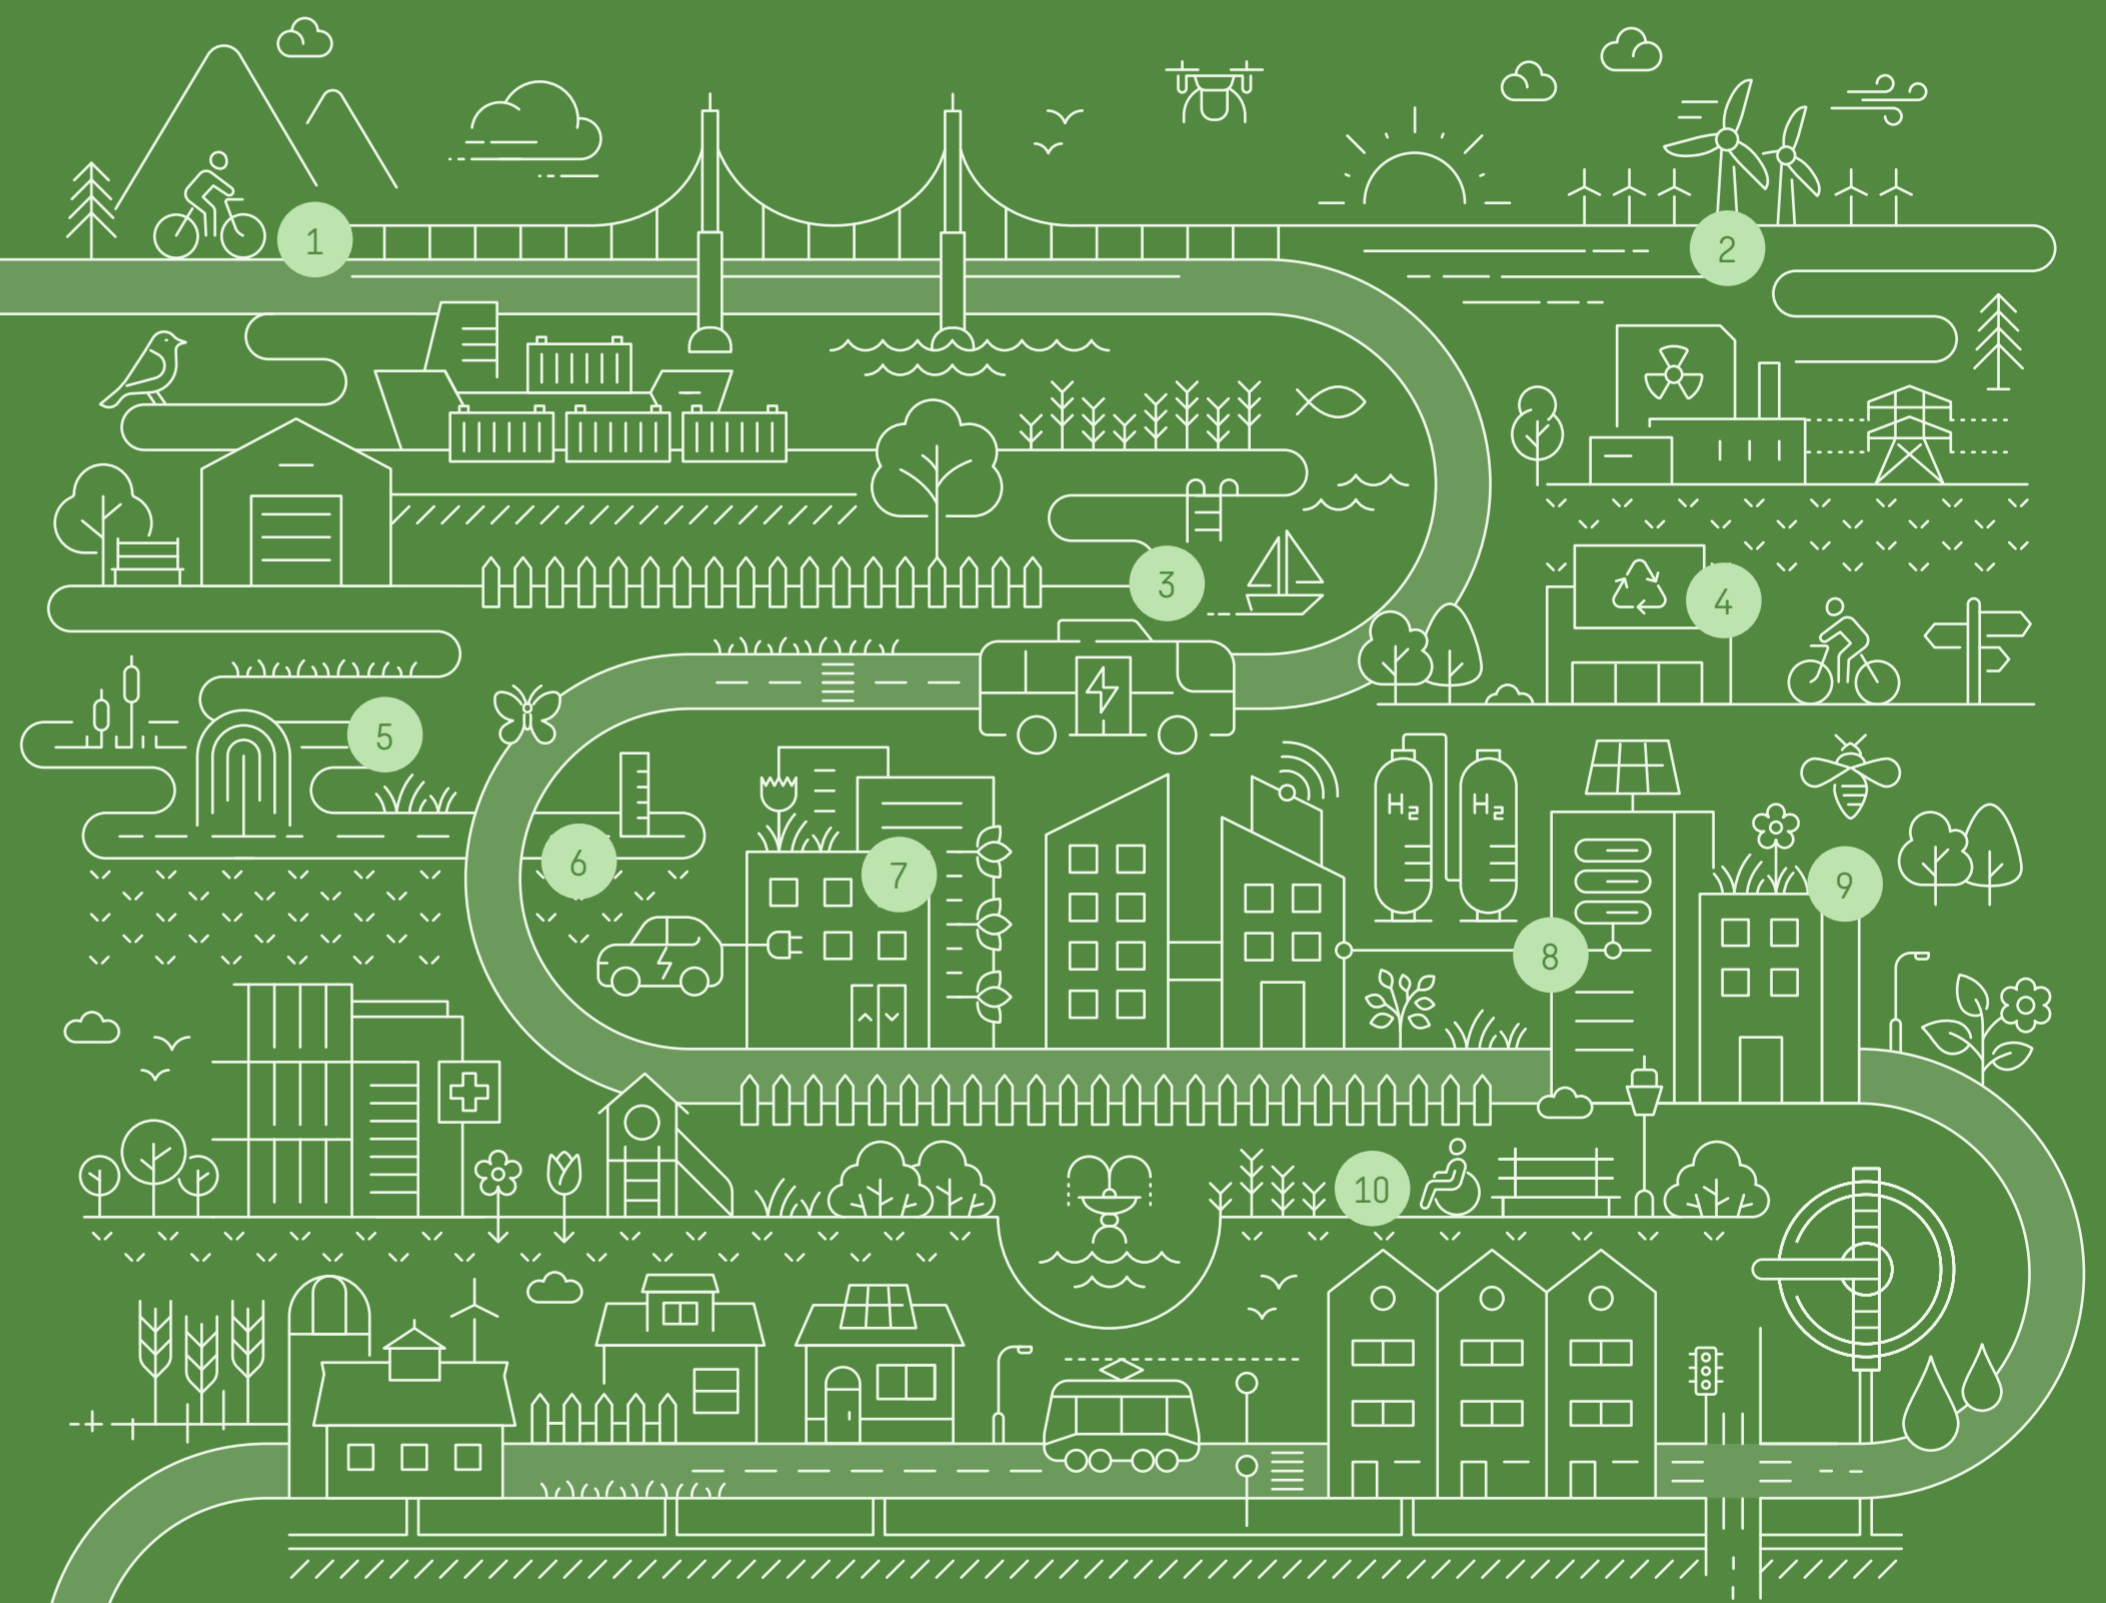

The Green Transition is a global shift towards sustainable practices and technologies aimed at reducing environmental impact, combating climate change and promoting circular economy methodology.

Collaborating across 200+ disciplines, Sweco seeks to be a role model in creating a better future for all – transforming society together across over 150,000 ongoing projects as we overcome society’s biggest challenges.

The Green Transition

Key checkpoints for the Green Transition

- 1 Sustainable transport
- 2 Clean energy infrastructure
- 3 Health & wellbeing
- 4 Circular economy practices
- 5 Nature-positive solutions
- 6 Climate resilience & adaptation
- 7 Green buildings
- 8 Digital transformation
- 9 Ecology & biodiversity
- 10 Inclusive placemaking

We are committed to challenging our clients – and ourselves – to deliver innovative energy, transport, urban, water and industry solutions through approachable consultancy, high-quality design and technical excellence across our multi-disciplinary service portfolio.
