

Green design is in our nature

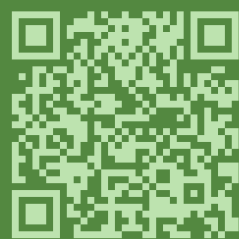

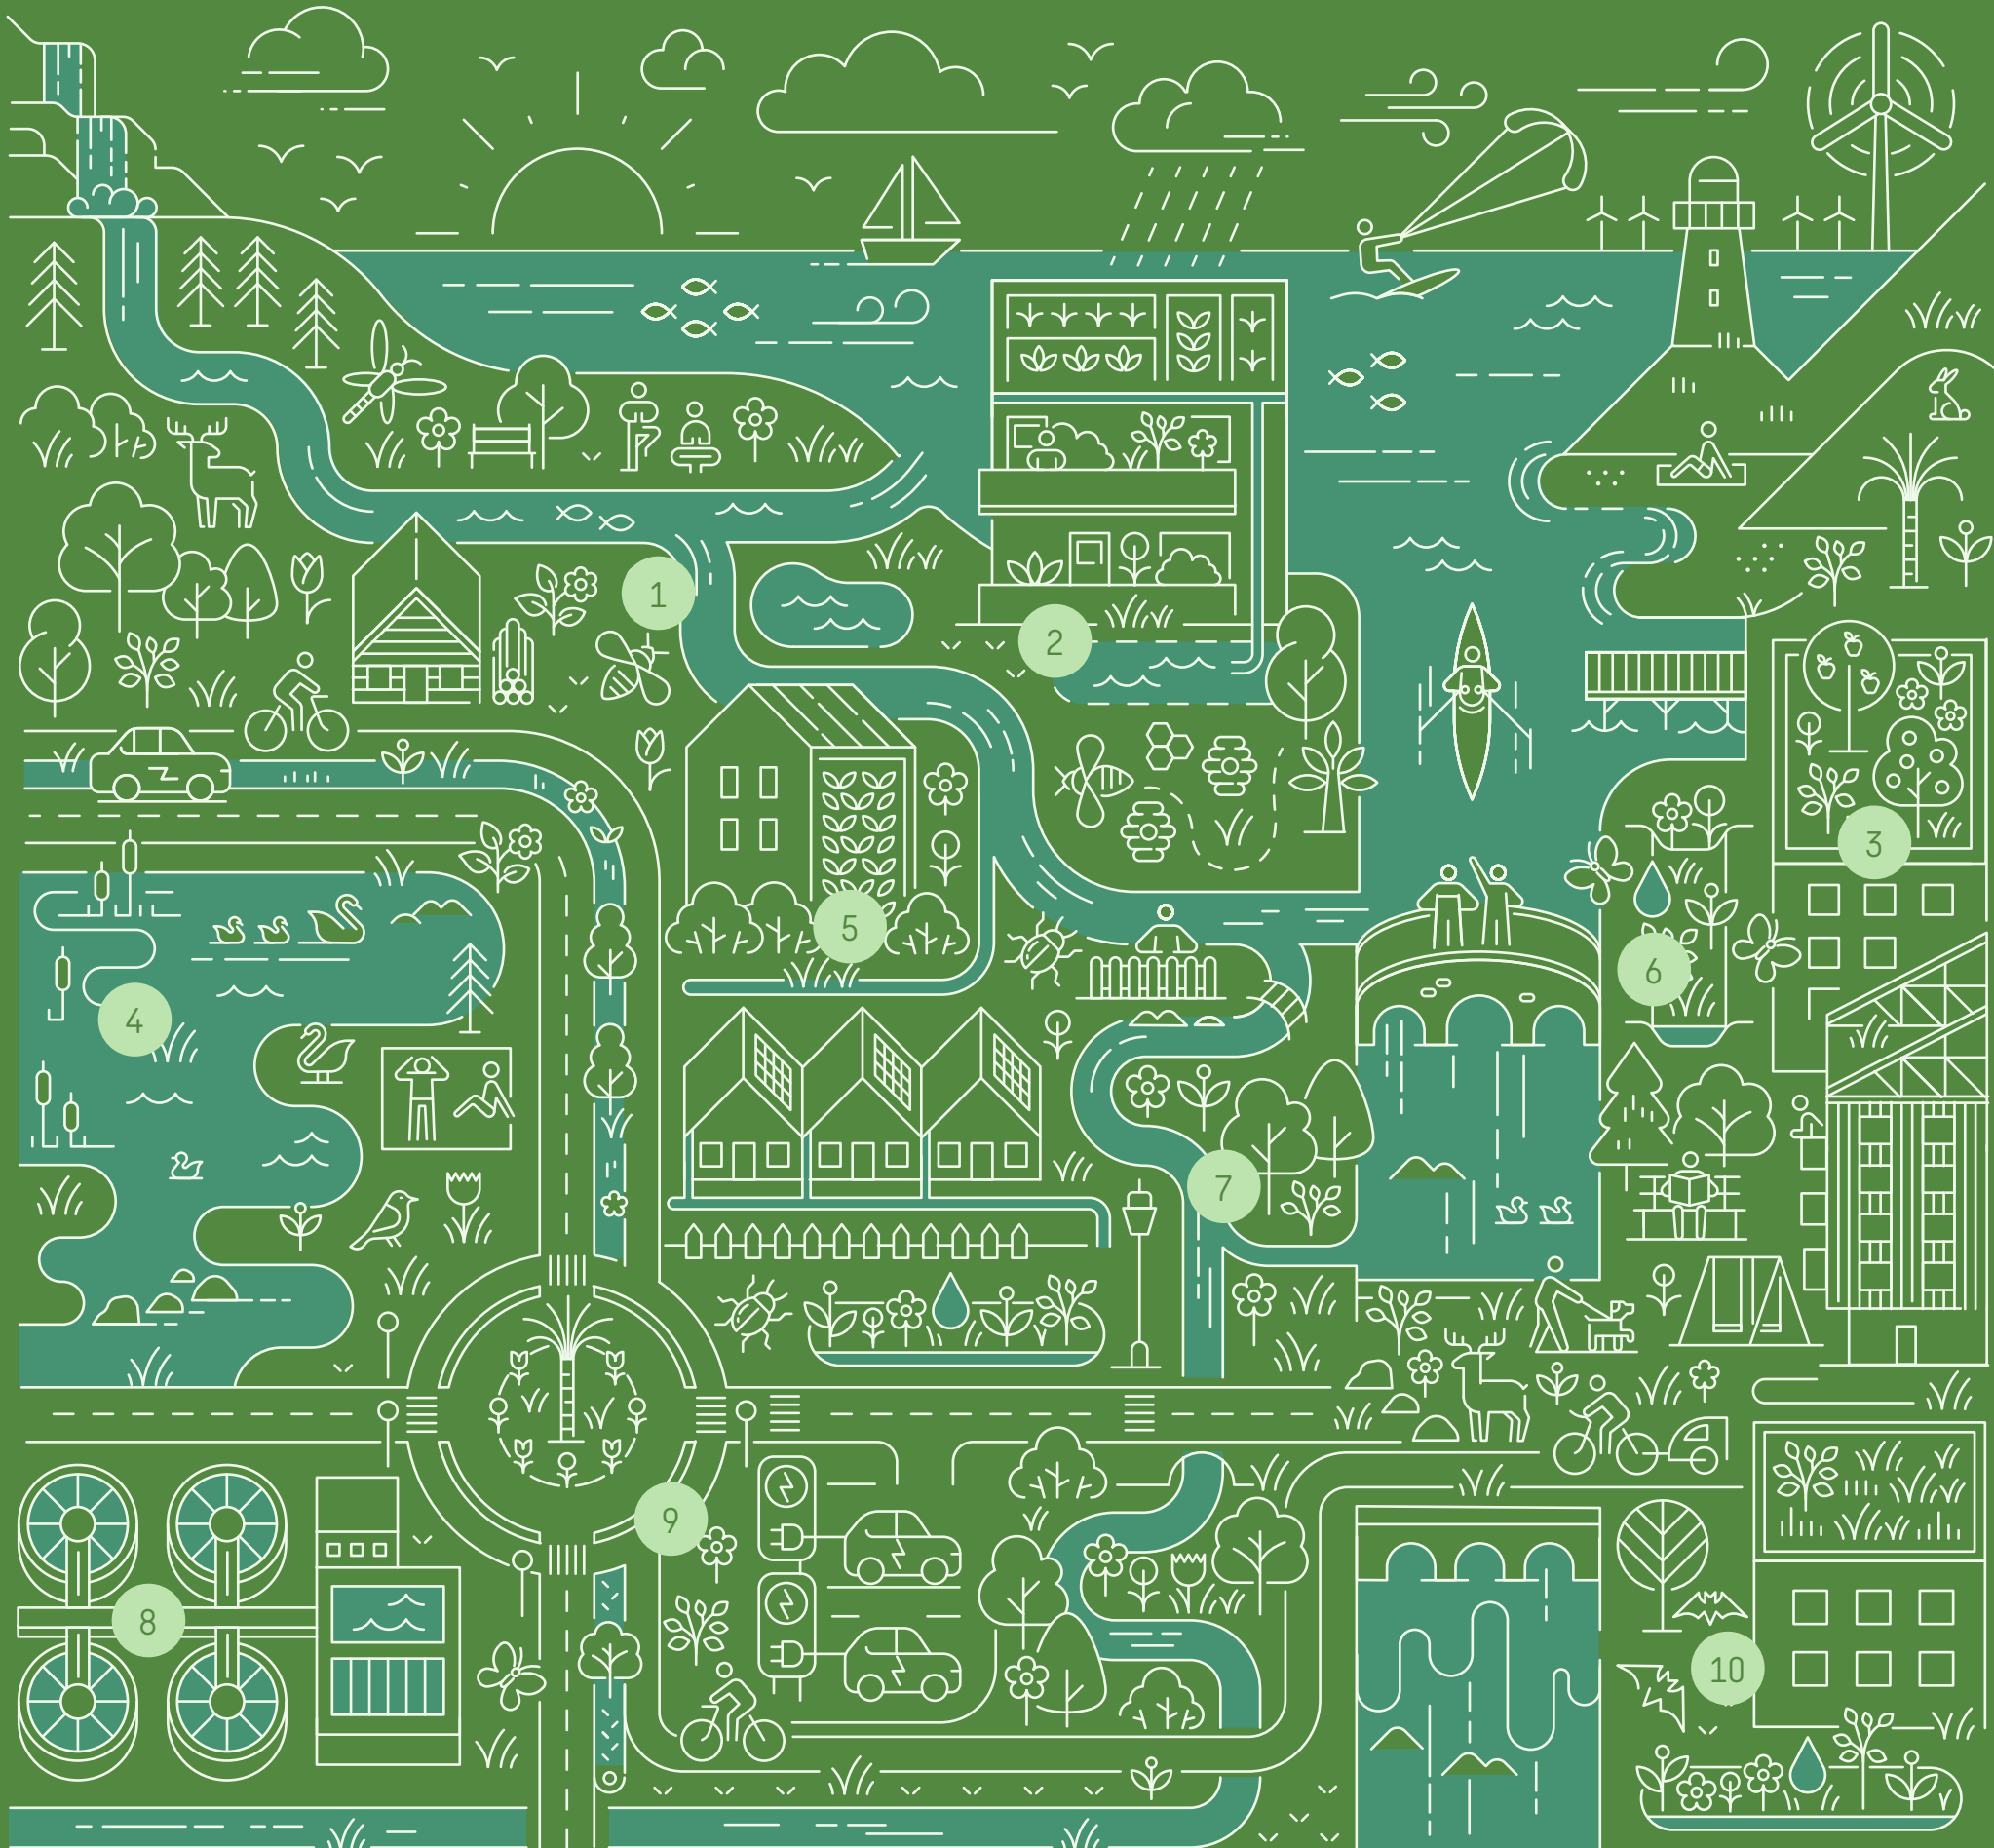

A critical enabler of the Green Transition, Nature-Positive Consultancy will play a vital role in reversing biodiversity loss, restoring ecosystems and embedding sustainability into planning and design. At Sweco, we believe that integrated green-blue infrastructure must serve both people AND the planet. By combining ecological expertise with inclusive design, we're helping to create places that support climate resilience, enhance wellbeing and bring biodiversity back into the heart of our communities.

Key foundations of a nature-led approach

- 1 Ecosystem & habitat recovery
- 2 Groundwater protection & enhancement
- 3 Green walls & roofs
- 4 Wetlands creation & conservation
- 5 Regenerative urban landscaping
- 6 Sustainable drainage systems (SuDS)
- 7 River restoration
- 8 Natural wastewater treatment
- 9 Verge management
- 10 Biodiversity net gain integration

Transforming
society
together
